Fast, Rich Compost

using earthworms

**ADOBE
& WORMS
LOOS**

Organic Waste &
Wastewater Treatment
Systems

Grow healthier plants

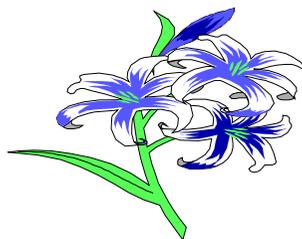

Recycle your waste

LET THE WORMS DO THE WORK

Earthworms are nature's wonder gardeners. They love garbage. They consume their own body weight of organic waste every day. You just feed your garbage to the worms. They do the hard work, all day, every day.

With NO FUSS OR SMELLS

PERFECT FERTILISER

Earth worms turn organic matter into rich plant food called castings.

Castings are one of nature's finest organic plant foods.

Tests by the U.S. Dept. of Agriculture show that soil worked by earthworms is up to 10 times richer in available plant nutrients than soil without worms.

NUTRIENT	% INCREASE
Nitrate of Nitrogen	500
Available Phosphorus	700
Exchangeable Potassium	1200
Exchangeable Calcium	150
Organic Carbon	200

Worms will provide you with your own free supply of fertiliser and can be incorporated with other materials to produce your own rich potting mixes.

BEAUTIFUL GARDENS

By introducing worm compost to your soil, worm eggs will hatch in your garden.

A healthy worm population will:

- # Increase soil fertility
- # Cultivate and aerate soil
- # Increase moisture retention
- # Improve drainage
- # Help break up clay soils.

This means enriched lush plant growth, beautiful blooms, nutritious organic fruit and vegetables.

LANDCARE & FARMS

Worms can play a major role in improving farm soils naturally.

They can be used to break down manure waste, spoilt hay and any other organic farm waste while at the same time creating your own free fertiliser and soil conditioner.

COMPOSTING TIPS - What goes in?

70% of all household waste is edible by worms.

Here are a few examples:

- Vegetable & Fruit scraps
- Animal Manure
- Lawn clippings
- Paper & cardboard
- Vacuum dust
- Food scraps
- Wood ash
- Sawdust
- Leaves
- Teabags

WORM FARMS

A Worm Farm at home is an easy way for householders to grow worms for themselves and care for the environment.

Provide your worms with food, (your garbage) and moisture and they become self propagating hard workers providing you with an ongoing supply of rich plant food and also bait worms for the keen fisherman.

Your WORM FARM comes with:

- The working trays or bin
- a liquid collector tray*
- fly & vermin proof lid
- worms as required

The ReIn can deal with the kitchen scraps for an average family.

A Worm Farm can also deal with "pet poo". A separate unit is recommended for your dog or cat.

ADOBE LOOS & WORMS can help you to set up a domestic or commercial Worm Farm. We can supply you with WORMS, solid & liquid CASTINGS, potting mixes and other worm farming products like Coco-Peat, Worm Blanket, and weedmat.
