

ADOBE LOOS & WORMS

Organic Waste & Wastewater Treatment Systems

NATURE LOO CLASSIC 650

The split system **Classic 650** waterless toilet is a smaller version of the Classic 750. It is mainly used as a second toilet or in Weekenders and small scale intermittent use work situations. The smaller chambers make it unsuitable as the only waterless toilet for full-time use by large families. Apart from the chamber size, the specifications are the same as for the Classic 750. Underfloor minimum height clearance is 650mm.

The Classic range is complete with everything required for installation, **including pedestal and seat**, except, for reasons of freight cost, the external vent pipe and absorption trench materials, which can be bought from your local hardware store for about \$80. **The minimum height required to install the chamber beneath the bathroom floor is 750 mm.**

Included in the standard Classic 650 - 2 Package are:-

- ♦ Fibreglass clean white hard wearing pedestal and matching seat.
- ♦ 2 composting chambers (65 cm high x 60 cm diameter).
- ♦ Waste connecting chute (70 cm in length - can be cut by you to suit your installation).
- ♦ Ventilation system including a 12 volt fan (only 1.8watts) and transformer.
- ♦ Easy to follow installation and maintenance manual.

The 2 chamber toilet is suitable for 2 people. It is possible to start with 2 chambers and add an additional chamber later.

Price: \$2,035

Capacity: 2 people on a permanent basis
